

Customised Low Power SRAM solutions (IMC) that improve performance at the Edge by reducing power consumption. These solutions are designed to meet the needs of applications that require high performance and low power consumption. The solutions are designed to be implemented in a wide range of applications, including:

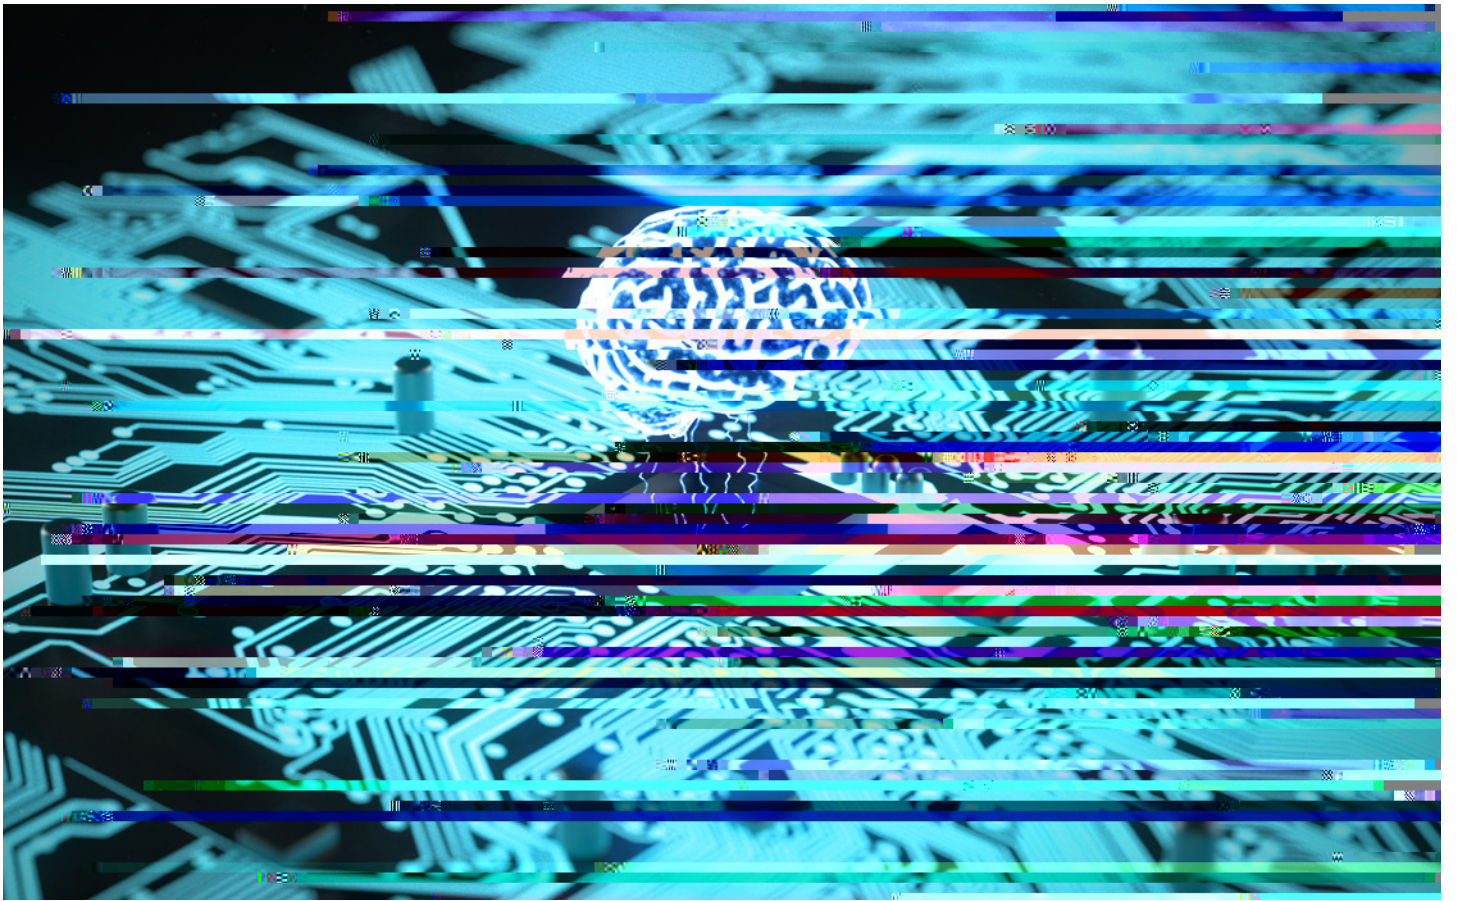

- AI-related applications
- Edge computing
- Mobile devices
- IoT devices

Our customised low power SRAM solutions are designed to be implemented in a wide range of applications, including:

- AI-related applications
- Edge computing
- Mobile devices
- IoT devices

Our customised low power SRAM solutions are designed to be implemented in a wide range of applications, including:
